

## 6<sup>th</sup> grade families remember to get your child's "7<sup>th</sup> grade" immunizations before school starts next fall

Minnesota State Law requires all incoming 7<sup>th</sup> graders to have proof that the student has had the Meningococcal (MCV,MPSV) and Tetanus, Diptheria and Pertussis (Tdap) immunizations or to have a notarized signature that you are opting out on file at the school before school starts in the fall.

Please consider having this done as soon as possible as the Medical Care Providers become extremely busy right before school starts and we really want your child at school.

If you are planning on opting out of these immunizations here is the link to the form that you need to sign in front of a notary (on the back of the form part 2B) and then turn into the school.
